Domgas International Supply and Support

Score VAC Limited is the sole official authorised supplier for Domgas International - Providing spares and support for the actuators and controls systems previously supplied by Domgas.

Originally founded in 1978, valve automation company Domgas International traded up until 1997, designing and manufacturing ¼ turn rotary and bespoke linear actuators for use with air, gas or hydraulic supply. When Domgas ceased trading in 1997, Score Group plc obtained full intellectual property for the company. In October 2015, Score VAC Limited - part of the Score Group of companies - took over the provision of all Domgas International services.

Domgas Actuators

Using Rotary 90 degree actuators with either scotch yoke or rack and pinion principles to meet the valve torque requirements, Domgas produced efficient opening and closing mechanisms for ball, butterfly and plug valves.

The bespoke designed Domgas Linear range provided a positive, reliable opening force for gate and globe valve applications.

Domgas actuators were fitted to all sizes of valve - From ½", up to and including 36", with frame sizes capable of producing torques up to:

- 4,000,000 lb. in / 552,000Nm (double acting)
- 500,000 lb.in / 56,000Nm (spring return)

Domgas linear actuators can achieve opening thrust requirements of 900,000 lb. / 4,000,000 Newtons.

Domgas Control Systems

Domgas International produced a full range of Actuator Controls Systems - From simple single solenoid control panels right through to pneumatic and electric powered Hydraulic Power Units.

Score VAC Limited now has control of all original Domgas files, allowing us to provide sales and support services for installed Domgas actuators and their associated equipment.

From simple seal kits to replacement actuators and complete controls systems, Score VAC Limited can provide the solutions that meet your Domgas needs.

For further information on Domgas related services or for a quotation, contact domgas@score-group.com

Score VAC Limited is part of the Score Group of Companies. Score Group plc have locations throughout the world. For further information on our product and service capabilities, please visit our website at www.score-group.com

- Valve supply, repair & overhaul
- Engineering & design consultancy
- Enhanced testing
- Valve automation & control
- Valve monitoring & diagnostics
- Subsea valves & assemblies
- Warship support

- Valve diagnostics products & services
- Offshore & onsite support
- Gas turbine repair, overhaul & testing
- Component repair & surface treatments
- Aerospace component manufacture
- Cell disruption systems
- Training & blended learning
