

A large offshore oil rig with a tall derrick and cranes, situated in the ocean under a blue sky with light clouds. A dark blue banner is overlaid at the bottom of the image.

# FIELD SERVICE SUPPORT

Score Group plc offer a comprehensive range of on-site or off-site valve upgrading, reconditioning, repair, modification and overhaul programmes.

With over 400 trained valve specialists and fully equipped workshop containers on standby, Score has the resources to provide customers with a complete on-site valve maintenance and overhaul service.

Independence from all valve and actuator manufacturers enables Score's clients to benefit from impartial optimal maintenance programmes which are efficient, cost-effective and professional.

Reconditioning, repair, modification and full overhaul of all valves irrespective of type, size, class or metallurgy are included in the range of service support that Score provides.

On-site valve evaluations can also be performed by Score to prevent potential valve problems occurring.

## Field services include:

- Valve & actuator troubleshooting
- Valve & actuator rebuilding
- Freeing seized or hard-to-turn valves
- Performing emergency valve sealing
- Commissioning of newly-installed valves
- Verifying & ensuring valve integrity
- Routine valve maintenance
- Acoustic monitoring
- Condition monitoring
- In-line overhaul
- Flushing & lubricating
- Relief valve re-certification

# VALVE SERVICES

Score Group can provide comprehensive valve services supported by fully equipped workshop facilities in most geographical locations worldwide. Our workshop facilities are operated by skilled competent personnel, each committed to Score Group's high service standards. We pride ourselves on being able to offer a fast-turnaround overhaul and modification service.

## Valve services offered include:

- Failure investigation including investigatory testing
- Stripdown of valves & associated equipment with condition reporting
- Valve component repair
- Overhaul of valves & associated equipment
- Engineering consultancy
- Valve modifications
- In-house welding, machining, non-destructive testing & coating
- Design, manufacture & testing of valve control systems
- Pressure & functional testing
- Development & application of bespoke test procedures to meet your requirements
- Full repair certification

Our experience gained from over 30 years of valve overhaul enables us to provide expert guidance during valve overhaul and modification activities.

All equipment is returned following overhaul with full certification and tested to the relevant international or industry standards. Score has Notified Body approval to maintain valve CE markings during overhaul and modification activities.
