

PSV Management & Maintenance Services

Score provide a suite of PSV Maintenance and Management Services which enables significant benefits to be gained during the life cycle of large population of installed PSV's

Score has the full capabilities and facilities to do all things to valves from conceptual design through machining, welding, plating, spares provision and rebuild, ultimately culminating in performance testing which simulates in service conditions. The service operates on two fundamental principles, the first being that you must understand the causes of failure in order to improve and secondly that you must performance test against the parameters of the intended use. There are a number of benefits which accrue from this but the main ones are that you stop repeated and/or premature failure, that you can immediately identify other valves at risk and therefore improvement opportunities, and finally that the process is very fast.

PSV Benchmarking

It has been recognised by the industry that an improved method is required that takes into account the PSV's previous performance, the service condition and the consequence of failure to lift or to hold pressure.

Score's PSV Benchmarking System determines the optimum recertification period for a PSV, commensurate with its service, performance and the consequences of failure to lift or hold pressure. The system is based on RBI (Risky Based Inspection) principles and is an advance on the many prescriptive regimes prevalent in industry.

- Optimises Recertification, Often Leading to Reduced Cost
- Identifies Poor Performing PSV's & Required Remedial Action
- Identifies Service or Operator Problems

On-Site PSV Recertification

Score provide on-site PSV recertification utilising a fully equipped mobile PSV van. This service is bespoke and provides the most cost effective method for PSV recertification.

On-Site PSV Recertification

- Fully equipped PSV Mobile Van
- Recertify all PSV Types up to 8"
- Maximum Design Pressure of 80 Barg
- Fully Trained & Competent Operators
- Standard Day Rate
- 24/7 Availability

PSV Maintenance Services

- PSV In-Line Testing
- Supply of Spares
- PSV Performance Benchmarking
- Provision of On-Site Troubleshooting
- 110 Competent PSV Technicians
