

Score Group Capabilities

Score Valves (Trinidad & Tobago) Limited is part of the Score Group of companies. Founded in Peterhead in the North East of Scotland in 1982 to provide valve repair and supply services to the UK oil and gas industry; today Score Group plc. hosts a global network of facilities in over thirty countries, providing engineering services across five continents within a range of sectors including oil & gas, nuclear and marine.

Valve sales and services remain at the forefront of Score's operations with the company now boasting the largest stock of valves and actuators in the world.

Fully independent from all manufacturers and their agents, Score provide impartial advice and solutions for all types of valve supply and maintenance issues.

The range of valve services offered by Score Group has evolved from valve repair and supply to the concept of Total Valve Management – one company providing a full range of services including repair, supply, testing, engineering support, valve diagnostics, condition monitoring, inventory management and technical training to valve users operating in the energy, utilities, marine and manufacturing sectors.

The range of services that are offered by Score Group plc. include:

- Valve & Actuation Sales & Services
- Valve Diagnostics
- Valve Condition Monitoring
- Industrial Gas Turbine Services
- Gas Turbine Fuel Systems & Accessories
- Engineering & Design Consultancy
- Subsea Valves & Equipment
- Enhanced Testing
- Hydraulic Services
- Valve Related Training
- Specialist Coatings
- Cell Disruption

In 2015 the Group employs over 1700 people. As a company Score Group plc is deeply committed to the training of its personnel and runs a multi award winning apprenticeship scheme.

Avon® and RB211® are trademarks of Rolls-Royce plc, which is not affiliated with Score Group plc.

TB5000 is a trademark of Siemens AG, which is not affiliated with Score Group plc.

Local Service, Global Provision

The leading single source provider for valve services with unrivalled expertise, experience, facilities and stockholding in the valve market worldwide.

Established in 2001, Score Valves (Trinidad and Tobago) Limited is located on the island of Trinidad. We are the largest company in the Greater Latin American region to provide single source sales and support services for valves and associated equipment. Our unique Total Valve Management system and our unrelenting focus on quality, together with a workforce of over 100 local highly skilled engineers, technicians and inspectors make us market leaders in the provision of valve and actuation services to the oil and gas industry.

Score Valves (Trinidad and Tobago) operate from a 75,000 square feet purpose-built workshop facility in Cunupia that is fully-equipped for the supply, overhaul and testing of valves.

With an extensive inventory of over 100,000 valves, Score can offer unrivalled lead times for the most urgent of supply or repair requirements. The unique Intelligent Valve Management™ package allows Score to offer a full complement of valve maintenance solutions.

Valve Services and Capabilities

- Valve and actuator supply
- Engineering support
- Total Valve Management contracts
- Valve automation services
- Valve & actuator repair
- Valve modifications
- Gas, hydrostatic, hydraulic and pneumatic testing
- Field support
- Project supply
- Supply chain inspection & expediting
- Valve diagnostics & condition monitoring
- Warehousing and inventory management

Total Valve Management

Offering a comprehensive range of on-site or off-site valve upgrading, reconditioning, repair, modification and overhaul programmes.

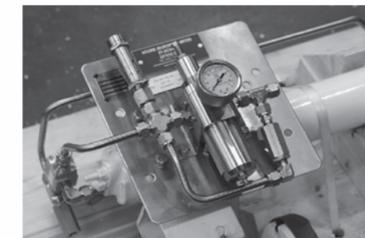

As part of the Score Group of Companies which holds the world's largest independent stock of valves and actuators - an inventory of over \$500,000,000 US - Score Valves (Trinidad & Tobago) Limited can call on the stock, experience and capabilities of the wider Group to support customers and provide integrated valve solutions. This allows us to provide essential benefits to our customers including:

- Increased plant availability
- Established maintenance routines
- Focused valve condition monitoring
- Maximised "Up Time"
- The optimum holding of valve spares
- Agreed and implemented stock profile
- Fully auditable process
- Increased plant safety
- The identification of high risk and problem valves
- Cost saving

Intelligent Valve Management™

As market leaders in the evolving valve supply and services sector and working independently to all valve and actuator manufacturers, Score deliver a unique, single-source valve solution in the form of the Total Valve Management programme.

Total Valve Management is the provision of a multi-faceted valve management service that encompasses valve selection, design review, procurement, FAT witnessing, manufacturer inspection and expediting, valve coding, stock-holding, consolidation and maintenance of stock, design modification, pressure and functional testing, enhanced valve testing, valve automation and control systems, product certification, delivery, commissioning support, valve diagnostics, overhaul and upgrade.

Gas Turbine Overhaul & Repair

We specialise in overhaul, repair, upgrade, modification, testing and supply of gas turbines, fuel systems and accessories.

Our purpose built gas turbine overhaul and test facility provides operators with a complete service for Rolls-Royce Avon, RB211 and Siemens TB5000 aeroderivative gas turbines.

By going beyond current industry standards, we provide a superior service through the application of advanced repair schemes and coating technologies. As a result, module assembly and engine final build standards achieve consistently higher levels of operational efficiency and reliability.

Unique OEM approvals and the latest aeroderivative service facilities allow the support of a vast range of equipment across many engine types manufactured by General Electric, Siemens, Rolls-Royce and Solar. A high quality and unparalleled turn around service utilising OEM parts and procedures ensure maximum performance and life span whilst retaining engine warranty. Our customer base includes major service centres, end users and OEM's throughout the world. We carry a large stock of parts and rotatable exchange units which can be shipped prior to planned shut down and therefore keep downtime to an absolute minimum.

- Market leading facilities
- Advanced coating technologies
- Cost effective repair schemes
- Extended life span and reliability
- Higher operational efficiency
- State-of-the-art engine test facility
- Extensive spares inventory

- Fuel nozzles, valves, regulators and pumps
- Bleed air and thrust balance control valves
- Fuel dividers, manifolds and feed pipes
- Lube oil pumps and valves
- Hydraulic controllers, pumps and servo's
- VSV and IGV actuators
- Starter motors
- Staging valves
- Sensors, cables and harnesses
- Approvals
