Specialized Testing

At Score Valve Services Inc. dedicated Research and Valve Test Facility:
A range of engineering testing criteria and techniques are performed at our state of the art facilities. These enhanced testing methods are then independently verified and certified on site to minimize lost time in the field. All testing is in compliance with appropriate valve specifications for a given application (noted below) and in accordance with customer requirements.

Capabilities

Hydrostatic

Up to 42" 600#
All valve types
0 – 20,000psi
Typical Standards:
API 6A/ISO 14313/API 6D/API 598/BS 12266

Low Temperature Testing

Up to 24" 600#
All valve types
0 to -196 deg C (and everything in between)
Typical Standards:
BS 6364, Shell 77/200, 77/306

Fugitive Emissions Testing

Up to 24" 600#
All valve types
Typical Standards: ISO 15848, Shell 77/312

Nitrogen Gas Testing

Up to 24" 600# in submerged tank
All valve types
0 – 20,000psi
Typical Standards: As above

Elevated Temperature Testing

Up to 24" 600#
All valve types
0 to +600 deg C (and everything in between)
As per customers specification

PR2 Testing/Cyclic Testing

All valves and tools etc.
As per customers specification

Pressure Safety Valve Certification

Up to 12" 150# Inlet
Typical Standard: API 527

All testing is controlled in an isolated control room monitored by CCTV and is both video recorded and chart recorded.

Safety & Environmental

Safety is our number one priority in the Score group of companies and we are committed to creating a safe working environment for all of our employees and those affected by our work. To achieve this aim, the company operates in accordance with a comprehensive health and safety management system guided by the OHSAS management system standard. The Score Group safety management system has been approved to the OHSAS 18001:2007 standard by Lloyd's Register of Quality Assurance since 2002.
