## Score Valve Services Inc.

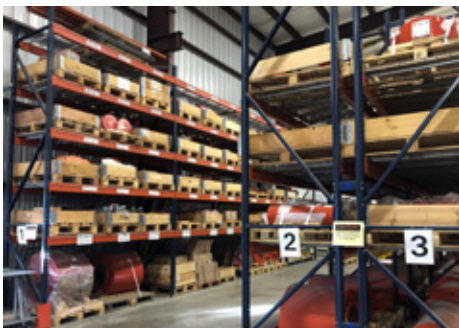

Score Valve Services Inc. has operated within the North American valve market for many years, providing a unique one-stop approach regarding valves. Residing in Houston, Texas we are dedicated to providing all our available services to the highest standard for our customers.

Score Valve Services Inc. is supported by the Score Group of companies, which allows us to access global inventory equating to over half a billion dollars of valves and associated equipment, on the shelf, ready for shipment.

Our concept of Intelligent Valve Management™ ensures that the right valve is in the right place at the right time and incorporates all of the following services:

- New Valve & Automation Supplies
- Automation & Control Systems
- Valve Engineering & Design Consultancy
- Project Valve Management
- Turnaround Planning & Management
- Valve Condition Monitoring
- Inventory Management
- Valve Repair & Certification Services
- PSV Recertification
- Field Services
- Hydrostatic & High Pressure Gas Testing
- Low Temp / Cryogenic / Elevated Temp Testing
- Fugitive Emissions Testing
- Torque Testing

# Intelligent Valve Management™

## Valve & Automation Sales

As a quality stockist and supplier of valves and actuators to the international oil and gas industry, Score Valve Services Inc. uses our knowledge, resources and over 30 years of experience to provide you with the correct equipment for your operational and on-going project needs. Our sales team will aim to source a valve or automation solution based on your specification and process requirements.

We specialize in providing our clients with complete packages, incorporating valve, interface drive, actuator and control systems for new and existing processes. Actuators and Control System components are supplied, developed and fitted to meet your unique and precise requirements. Our specialist engineers will ensure that your actuation package is designed to the highest of standards. This coordinated approach, part of Score's Intelligent Valve Management™ system, provides long-term, reliable and safe operation of the complete package.

## Valve & Automation Repairs

Score Valve Services Inc. offer a comprehensive range of valve upgrading, reconditioning, repair, modification and overhaul programs.

No valve repair should be purely based on damaged components without considering the cause of failure, process conditions and valve compatibility. Once the valve is repaired correctly, or in some cases replaced with the right valve, Score retains all certification and traceability documentation, providing total peace of mind.

## Field Services

Score Valve Services Inc. are leading providers of a wide range of valve field services which can assist you in the task of maintaining your valve population. Some of our on-site services available include: valve diagnostics, PSVs, automation, on-site machining, torquing and valve surveying.

Our global team of over 250 technicians have unrivaled experience, competency and training which has allowed them to gain excellent troubleshooting and problem solving skills. Using surveys and diagnostic services our team can assist with all aspects of proactive scheduled maintenance from planning, to execution, as well as provide immediate support during unplanned shutdowns.

# Testing & Valve Diagnostics

## Hydrostatic Testing

Valves of a variety of types are tested within our purpose built, fully enclosed test cells at prescribed pressures using a wide array of fluids, such as inhibited water, in accordance with international standards including API 6A and API 598.

## High Pressure Gas Testing

Utilizing high-pressure pumping systems, valves and other components can be tested fully submerged at internal gas pressures of up to 30,000 psi. Any external leakage can be monitored through our surveillance systems and any internal leakage, however small, is detected and measured by our fully calibrated gas flow meters.

## Temperature Testing

We offer Cryogenic and Elevated Temperature Testing in our purpose built facilities for various valve types including: ball, gate, globe, check and butterfly. Valves up to 24" Class 1500 can be tested in our temperature controlled chambers from -196°C to 650°C.

## Leak Detection Testing

A variety of valves of different sizes and types are tested with tracer gases including helium at a mix specified by the client. External leakages can be detected or pinpointed using a mass spectrometer. Score carries out emissions testing in accordance with international standards such as ISO 15848.

## Valve Diagnostics

Our MIDAS® Valve Diagnostics range of products is a leader in valve leak detection and valve condition and performance monitoring. Exclusive to Score Group plc, we provide the following equipment and services:

**MIDAS Meter®**  
Ultra-portable acoustic emissions (AE) valve condition monitoring device

**MIDAS Sensor®**  
Hard wired, permanently installed acoustic emissions (AE) valve condition monitoring device

**V-MAP® G3**  
Fully integrated, critical valve condition monitoring system

**V-MAP® Portable**  
Portable, critical valve condition monitoring system

# Score Group Capabilities

Score Valve Services Inc. is part of the Score Group of companies. Founded in 1982, Score Group plc hosts a global network of facilities in over thirty countries, providing engineering services across five continents within a range of sectors including oil and gas; nuclear and marine.

Valve Sales and Services remain at the forefront of Score's operations, with the company now having one of the largest stock of valves and actuators in the world.

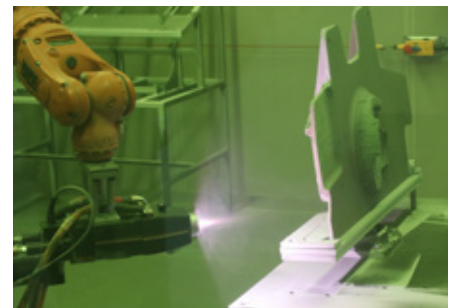

Ordering and delivery processes are quick and efficient, allowing us to always be prepared to help you find the optimum solution to meet all your valve requirements.

The range of valve services offered by Score Group has evolved from valve repair and supply to the concept of Intelligent Valve Management™ – one company providing a full range of services including repair; supply; testing; engineering support; valve diagnostics; condition monitoring; inventory management and technical training to valve users operating in the energy, utilities, marine and manufacturing sectors.

The range of services that are offered by Score Group plc include

- Valve & Actuation Sales & Services
- Valve Diagnostics
- Valve Condition Monitoring
- Industrial Gas Turbine Services
- Gas Turbine Fuel Systems & Accessories
- Engineering & Design Consultancy
- Subsea Valves & Equipment
- Enhanced Testing
- Hydraulic Services
- Valve Related Training
- Specialist Coatings
- Cell Disruption

The Group employs over 2000 people worldwide. As a company Score Group plc is deeply committed to the training of its personnel and runs a multi-award winning apprenticeship scheme.
