

VALVE CONDITION MONITORING AND DIAGNOSTIC SOLUTIONS

Score Diagnostics Limited is a leader in Intelligent Valve Monitoring™ and manufactures the MIDAS® range of Valve Diagnostic products. By using Score's Diagnostic products the user can quickly determine the condition of their valve population allowing evidence based decisions to be made on any required valve maintenance

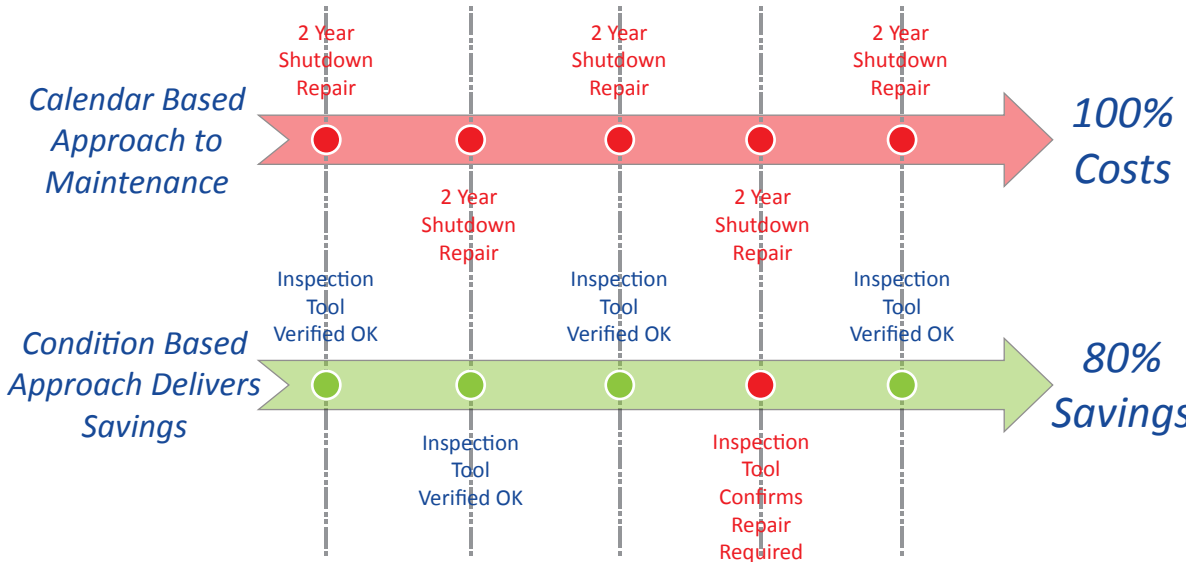

Delivering improvements in:

- Safety performance
- Environmental performance
- Financial performance

Key customer benefits:-

- Operating cost reductions
- Risk minimisation
- Efficiency savings
- Compliance evidence

Score Europe and local JV partner AWJ Energy have established Score Arabia Services to bring expert valve repair, valve training and valve diagnostic capabilities to companies working in the Saudi energy sector. AWJ Energy will be supporting the JV through established in-country relationships and will be assisting to meet Saudi Arabia's Vision 2030 that drives localisation and job creation through the development of local talent. Score Arabia Services has an experienced team of workshop personnel, in addition to having a range of fully equipped workshop facilities which allows the company to provide responsive support whether in the field or in fast tracking an urgent repair.

REDUCING COSTS THROUGH VALVE REPAIR, TRAINING AND DIAGNOSTICS

Success Commitment Ownership Respect Excellence

Approvals held within the Score group of companies.

REDUCING COSTS THROUGH **TOTAL VALVE MANAGEMENT**

Score Arabia Services offer a Total Valve Management concept as means of categorising a valve’s criticality in terms of its importance to safety and plant operability. The strategy provides a framework for site maintenance, compliance with applicable safety requirements and ensures best long term value.

- Experienced field engineer support to carry out site based valve & actuation repairs
- Failure analysis studies & reports
- PSV & valve shutdown planning, management & support
- Valve flushing, lubrication & sealant injection
- Detailed site surveys
- Spare parts management & control
- Establishing maintenance routines
- Participation in shutdown planning meetings utilizing Score's experience in valve repair/maintenance
- Establish optimum level of spares using Score's valve knowledge of typical valve failure modes

REDUCING COSTS THROUGH CUSTOM BUILT **WORKSHOP FACILITIES**

Score Arabia Services has the capability to complete all workscopes in house, we are a one stop shop for all valve service requirements. From a custom built facility enabling fast and efficient processing of work to understanding different valve failures through engineering. This all leads to improvement, reliability and longer service life for any valve type, size and rating.

- Liquid PSV Test cell
- Gas PSV Test cell
- Hydrostatic Test cells – 20,000 PSI MWP
- Hydrostatic Clamp Test – 6,400 PSI MWP
- Underwater Gas Testing – 9,000 PSI MWP

REDUCING COSTS THROUGH IN-KINGDOM **VALVE TRAINING**

Each of the courses are carefully balanced between theory and practical training, allowing attendees to gain hands-on experience working with valves and their associated equipment. The Score Arabia Services’ facility is split into both classroom and workshop areas, ensuring the best possible learning experience for our customers.

Machining capabilities

- Vertical Boring Machine
- Lathes
- Milling Machine
- Radial Drill
- Rotary Shotblaster
- Sand blaster

- Wide range of courses available for technicians, engineers, buyers or inspectors
- Awareness, knowledge & skill-based training
- Courses developed by specialist valve & actuation engineers
- Training delivered by experienced valve technicians
- Training workshop facility & supporting classrooms
- Provider of training to over 40 oil & gas industry companies worldwide
