Score On-Site Services

Approvals held within the Score group of companies

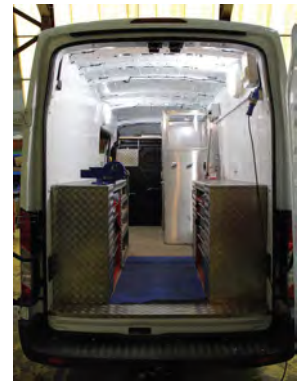

Valve Response Unit

Delivering a full range of on-site engineering services straight to your doorstep.

- Rapid response service 24/7
- No need to remove valves from site
- Fully equipped PSV workshop complete with pressure test facilities
- Campaign planning and execution including the provision of spares, bolting and gaskets

- A team of over 250 highly trained VQ level 3 qualified field service technicians
- Joint integrity management services
- Specialist on-site machining and welding
- Non-destructive testing including dye-penetrant, MPI, UT, ferrite testing, hardness testing and PMI

Joint Integrity Management

Joint integrity services, maintaining plant integrity and minimising downtime.

- Bolt torque and tensioning services
- Removal and replacement of corroded bolting (hotbolting)
- Flange spreading, pulling and nut splitting
- Flange facing and end prepping up to Ø120" (Ø3050mm)
- Complete project management ensuring on-time flawless start up, first time, everytime
- Joint integrity database providing full traceability and documentation
- Multi-skilled technicians providing minimal downtime

Repair and Pressure Testing Services

As a market leader in the valve industry, we have the global valve knowledge and expertise to find a solution to your problem.

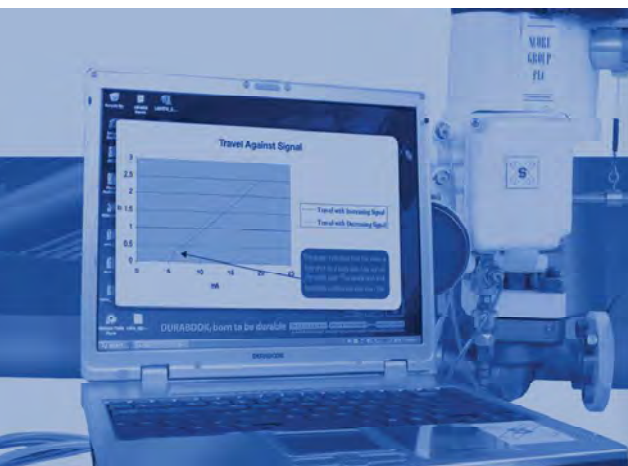

- Site based valve and actuator repairs
- Over 20 mobile valve workshops complete with testing facilities
- Bespoke engineering solutions
- Portable grinding and lapping technology
- Valve and actuator field torque testing, inspections and surveys

- Preventive valve and actuator maintenance routines
- Valve flushing, lubrication and sealant injection
- Valve and actuator inventory of over \$250,000,000
- Independent of all valve/actuator manufacturers whilst holding letters of support from the top brand names

Valve Diagnostics and Condition Monitoring

Valve diagnostics and condition monitoring, helping to avoid production losses, fugitive emissions or downtime for repairs.

- Midas Meter® - On-line valve leak detection and quantification
- Control valve benchmarking and performance analysis - profiler technology
- V-MAP™ - In-line continuous valve condition monitoring
- TUV approved in-service on-line safety valve testing - PreVenTest™
- PSV benchmarking and risk based analysis

Local Service, Global Knowledge
