### **X-mas Tree Solutions:**

Score *Subsea and Wellhead Limited* offer to fully re-engineer, test and certify client's Tree Stock to meet any forthcoming projects on a Fast-Track basis affording client's reduced costs and improved project planning and delivery.

### **Subsea Pipeline & Module SSIV's on a Fast-Track Basis:**

We offer a uniquely engineered valve and actuator service to globally support the specialised needs of Operators' Marginal and Deepwater Field Developments.

### **Project/Consultancy:**

A dedicated and technically qualified team of Engineers and Project Managers offer Client their expertise, independent and impartial advice.

### **Subsea Valve Supply:**

Score have a multi-million £(GBP) inventory and are confident your needs can be met if not exceeded within the timescale of your project.

### **Client SIT's:**

Score offer their clients 100% confidentiality along with exceptional SIT facilities to proof test either a product or to recertify / prove a system refurbishment.

### **Engineering and Design Consultancy (EDC):**

Drawing on a unique knowledge base of performance data, Score's Engineering Design and Consultancy (EDC) provides clients with independent support at every stage of a project, from Front End Engineering through to commissioning and operation.

### **Transmissions:**

Our Transmissions Division can fully support client's Plant to maximise uptime as they have the facility to fully load test most types of industrial units. To further aid industry, Score have recently upgraded their facilities to fully test all Allison World Transmissions as well as • ZF • Clark • Spicer • Twin Disc • Borg Warner • Volvo etc.

### **Water Jet Profiling:**

Score *Subsea and Wellhead Limited* have a purpose built Water Jet Profiling facility. Using our EH315 machine, we offer a fast, cost effective method of meeting most profiling requirements. To compliment this, our in-house CAD design facility to produce both 2D and 3D drawings to meet our customers' requirements.
